

Van Gogh Painting Research

Things to consider when you analyse a Painting:

1. Technical Details	Artist: Title: Date: Materials: Size: Location (gallery):
2. Composition (What does the painting show: the subject matter and main features. What is in the background, middle ground and foreground)	
3. Type of Art (What type/style of art is it and what features /characteristics does it have to explain this)	
4. Techniques (brushwork, colours and style)	
5. Personal opinions (Does the painting have narrative content (tell a story), the mood of the painting, do you like it. Do you think it is good, successful?)
